The MAILING DATE of this communication app Period for Reply	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Application/Control Number: 10/550,356

Art Unit: 1623

The disclosure is objected to because of the following informalities: the specification on page 1 fails to state that this case is a 371 of PCT/EP04/03514 filed 04/02/2004.

Appropriate correction is required.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis in claim 1 for linoleic acid as set forth in claim 2.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims are rejected under 35 U.S.C. 102(b) as being anticipated by Tiemessen (EP 1 273 288).

Tiemessen discloses 33-epichloro-33-desoxyascomycin (page 3,paragraph [0010] lines 1-6 in combination with a ceramide such as sphingolipid (page 4, paragraph [0036] useful for the treatment of dermatological diseases (page 7, paragraph [0060].

Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chamlin et al (J. Am. Acad. Dermatol, Vol. 47, No. 2 (2002).

Chamlin et al disclose administration of an immunosuppressive agent and ceramide for the treatment of dermatitis.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tiemessen (EP 1 273 288) in combination with Enjolras (U.S. Patent No. 5,656,278).

Tiemessen disclose the use 33-epichloro-33-desoxyascomycin in combination with cetamide for the treatment of skin conditions but do not disclose the use of linoleic acid. However, since Enjolras discloses a dermatological composition comprising ceramide in combination with linoleic acid, a person having ordinary skill in the art at the time the claimed invention was made would have been motivated to combine

Application/Control Number: 10/550,356

Art Unit: 1623

dermatological composition disclosed by Tiemessen with a dermatological composition disclosed by Enjolras because Enjolras discloses the advantages of adding linoleic acid to dermatological compositions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
